

# Eucharistic Miracle of LEGNICA

POLAND, 2013

Interior of the Church

Facade of the Church where the miracle took place

Professor Barbara Engel, after analyzing the sample, said: "The scientists' conclusion is that it is human myocardial tissue."

On January 5, 2014, the priests noticed a stain on the Host, which was immersed in the water. Similar to a bloodstain. The Bishop of Legnica, Monsignor Stefan Cichy, was immediately informed. He established a scientific commission to analyse the event

The fact that the Legnica miracle happened in a church dedicated to St. Hyacinth (1185-1257) is significant. St Hyacinth was a Dominican saint who was devoted to the Eucharist and who also experienced a Eucharist Miracle. When the fierce Mongolian troops had reached the outskirts of Kiev, St. Hyacinth took the ciborium containing the consecrated Hosts and was taking them to safety. He arrived at the back of the church and heard a voice coming from the Madonna statue near the altar calling him, "Hyacinth, Hyacinth. I see you're rescuing my Son, but you will not want to leave His mother in the hands of the desecrating barbarians?" He apologised saying it was impossible for him to lift such a heavy weight, but Our Lady replied: "If you had a little more faith and love for me, it would be easy for you to carry this burden." "I do not want anything but to love you and trust in you," said St. Hyacinth. Immediately the statue became as light as a feather and St. Hyacinth, accompanied by his fellow friars, miraculously crossed the wide river Dnieper and went unnoticed amid the Mongolian troops.
